

## Installation Guide:

### 1. Step 1:

- Download Extension and place inside your Project root/app/code/

### 2. Step 2:

- In magento root directory run the following commands using the command line:

```
php bin/magentosetup:upgrade
```

```
php bin/magentosetup:static-content:deploy
```

### 3. Step 3:

- Login to Magento admin and enable extension at Stores=>Configuration=>MageCaptain=>FormBuilder

### 4. Step 4:

- That's it, you're done.

## Description:

To Creating a Web form / Html Form with action it is difficult task to Non – Technical Person / User in Magento. Mage Captain Form Builder Extension Provide this Functionality Means Non-technical Person / User Create and Manage Form Easily without any Knowledge of code. Using this Extension Admin can create various kind of form as per requirement. Also Admin can set Slug for Each form, means Each Form have separate URL for Frontend.
