Installation Guide:

1. **Step 1:**
   - Download Magecaptain_Core from this GIT link and place inside your Project root/app/code/
     https://github.com/magecaptain/core

2. **Step 2:**
   - Download Extension and place inside your Project root/app/code/

3. **Step 3:**
   - In magento root directory run the following commands using the command line:

     php bin/magento setup:upgrade
     php bin/magento setup:static-content:deploy

4. **Step 4:**
   - Login to Magento admin and enable extension at Stores=>Configuration=>MageCaptain=> Product Gallery Load

5. **Step 5:**
   - That's it, you're done.

Description:

Default Magento Product Detail Page takes time due to Product Gallery. When Product Detail Page opens at that time loader show instead of Product Image and when Page load completely then that loader hide and Product Image Show at Gallery.

But this process takes time, MageCaptain developed a Product Gallery Load extension to hide that loader image when Page load.

Magecaptain Product Gallery Load Extension shows Base Product Image instead of that loader image when page load. using this extension, site visitors No need to wait for full page load to see that Product Image.

How to Use:

Admin panel

❖ Set Global Configuration from this way:

Stores=>Configuration=>MageCaptain=> Product Gallery Load

Or

Magecaptain => Product Gallery Load => Settings

⇨ **Gallery Setting:**
- Enable or Disable Extension
- Show Slider Vertically by default slider show Horizontally
- Show / Hide Slider

Features:

- Enable/Disable extension from a backend.
- In admin there is option to Show Slider Vertically and based on that option, at frontend Product detail page show slider vertically. By default it Slider Show Horizontally.
- In admin there is option Show / Hide slider, and based on that option at frontend Product detail page Product Gallery Show / Hide Slider.
