```

### 3. Step 4:

- Login to Magento admin and enable extension at Stores=>Configuration=>MageCaptain=> Optimized Images In WebP

### 4. Step 5:

- That's it, you're done.

## Description:

WebP Images Converter extension allows converting jpg, png, gif images to Webp format. Productive image quality even after the compression of the image. You can reduce your image file sizes without quality losses or even the same image quality. Also, the admin can change image quality from the backend. It's useful for page load faster and optimized performance. Webp file format recommended by Google.

## How to Use:

### Admin panel

❖ Set Global Configuration from this way:

- Stores=>Configuration=>MageCaptain=> Optimized Images In WebP

⇒ **General Setting:**

- Enable or Disable Extension

- Quality (1-100): set image quality between 1 to 100
- Media Folders Skip: admin can set media folder or file for skip convert to webp.
- Static Folders Skip: admin can set Static folder or file for skip convert to webp.
- Convert HTML Picture Tag Images: if yes set that automatically image tag convert to html Picture tag.
- Convert CSS Background Images: If you use CSS background images in an HTML tag style attribute, you may enable this option to convert these images to WebP.
